ROMA 4.4.6 – Release Notes

July 3, 2021

Contents

- 1. FutureFit.AI Application Integration with ROMA..... 3
- 2. Bug Fixes 4

1.FutureFit.AI Application Integration with ROMA

What?

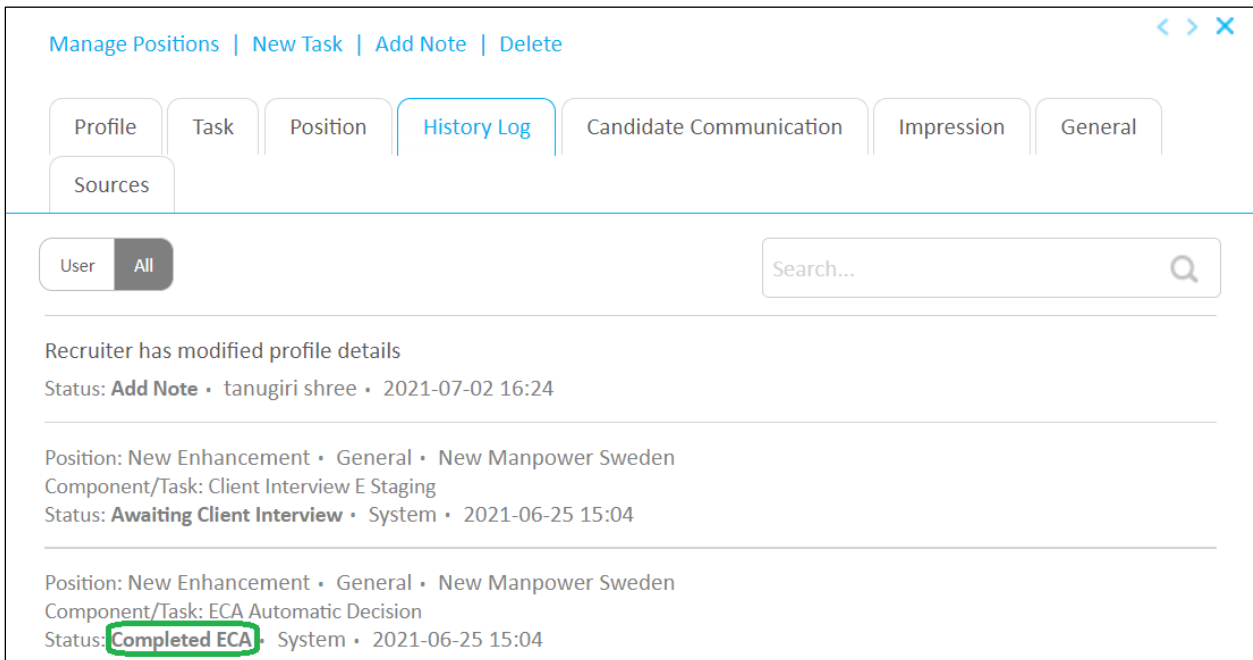

The FutureFit.AI (FFAI) application is now integrated with ROMA to improve the selected candidate's competency level. The stated integration enables the candidate redirect to the FFAI application from ROMA Candidate Portal and this integration is made available for **Sweden**.

Why?

It redirects the candidate to FFAI page from ROMA Candidate Portal where the candidate can enhance their competency level.

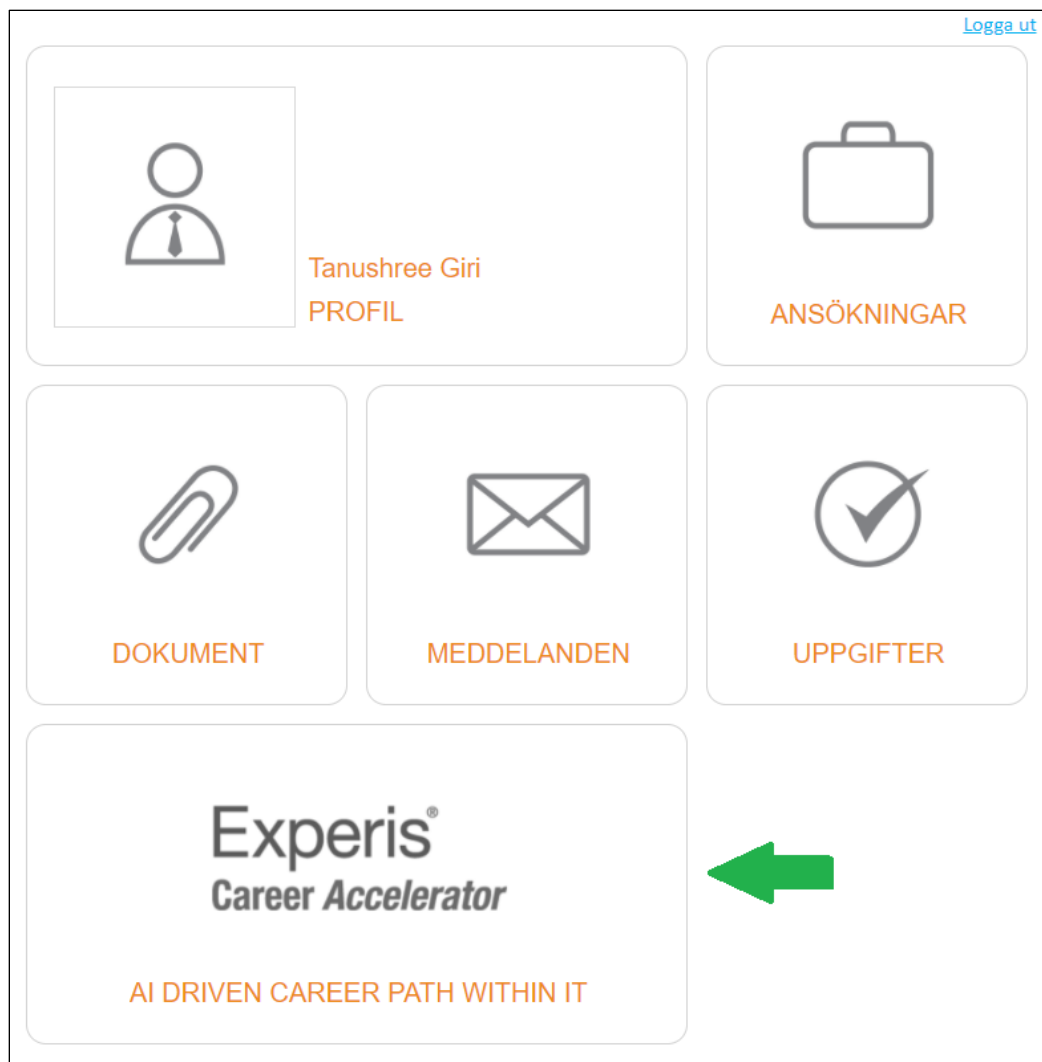

How?

When the candidate met the recruiter's expectation based on the workflow, the candidate will be tagged with status of "Completed ECA". The status will enable a link (Experis Career Accelerator (ECA)) in Candidate portal and it will allow candidate redirect to FutureFit.AI application.

The screenshot displays the 'History Log' tab in the ROMA Candidate Portal. At the top, there are navigation links: 'Manage Positions', 'New Task', 'Add Note', and 'Delete'. Below these are several tabs: 'Profile', 'Task', 'Position', 'History Log' (which is selected), 'Candidate Communication', 'Impression', and 'General'. A 'Sources' tab is also visible. The main content area shows a list of activities. The first activity is 'Recruiter has modified profile details' with a status of 'Add Note' and a timestamp of '2021-07-02 16:24'. The second activity is 'Position: New Enhancement • General • New Manpower Sweden' with a status of 'Awaiting Client Interview' and a timestamp of '2021-06-25 15:04'. The third activity is 'Position: New Enhancement • General • New Manpower Sweden' with a status of 'Completed ECA' (highlighted in a green box) and a timestamp of '2021-06-25 15:04'. A search bar is located at the top right of the main content area.

The status will enable a link in Candidate Portal.

2. Bug Fixes

What?

Along with the new integration being enabled with ROMA in this new release, we have addressed most critical incidents / bugs to ensure a smooth user experience or make our platform a robust and reliable one. We will be communicating with all clients providing all the details of the bugs that were resolved specific to them as part of 4.4.6 release.

We truly hope you love ROMA 4.4.6 😊

Thank you
