1.1	Searching candidate with username as email id in Global Search	3
1.2	Searching candidate with other phone number and country code in Global Search.....	4
1.3	CV functionality in Best Match	5
2.	Bug Fixes	6

1. Major Fixes

What?

As part of application maintenance, we have proactively identified few issues and fixed those issues as part of this release.

1. Searching candidate with username as email id in Global Search
2. Searching candidate with other phone number and country code in Global Search
3. CV functionality in Best Match

Why?

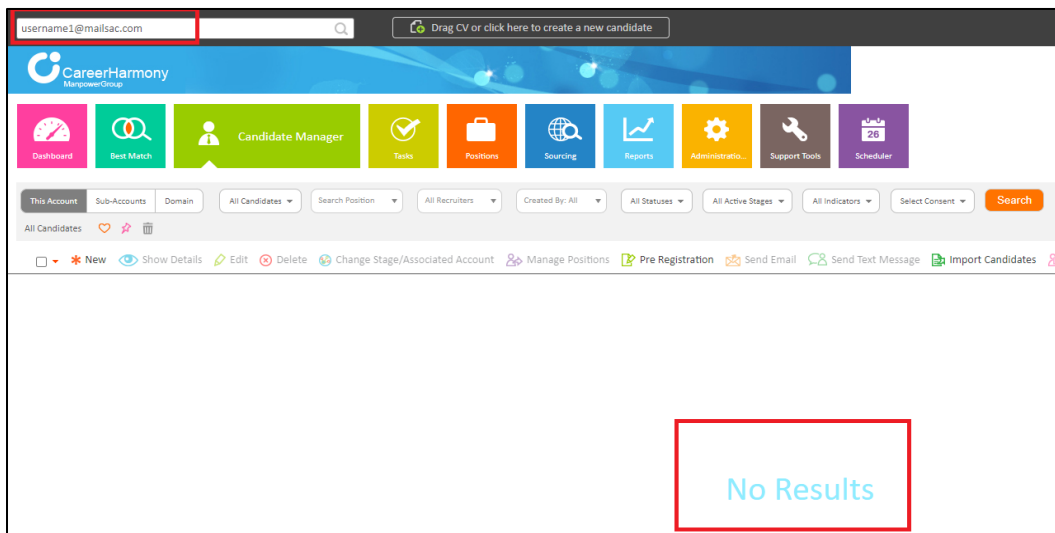

To make sure the ROMA application up and run.

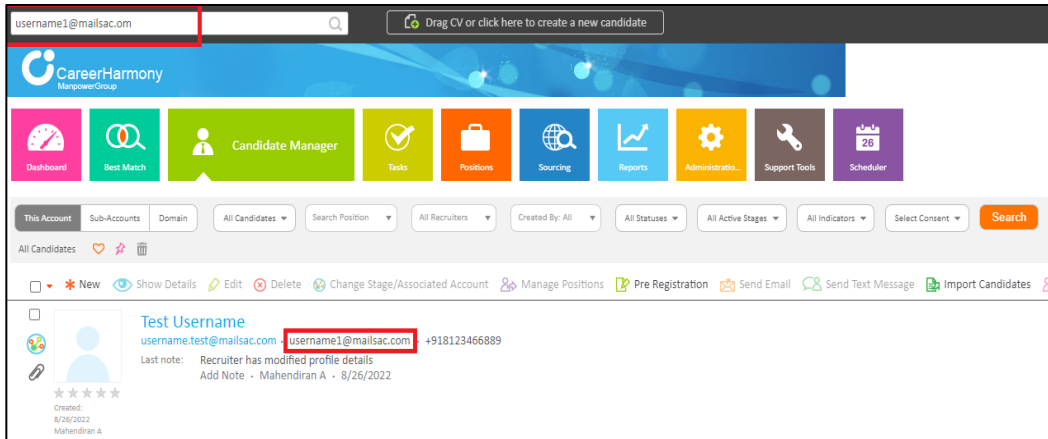

How?

1.1 Searching candidate with username as email id in Global Search

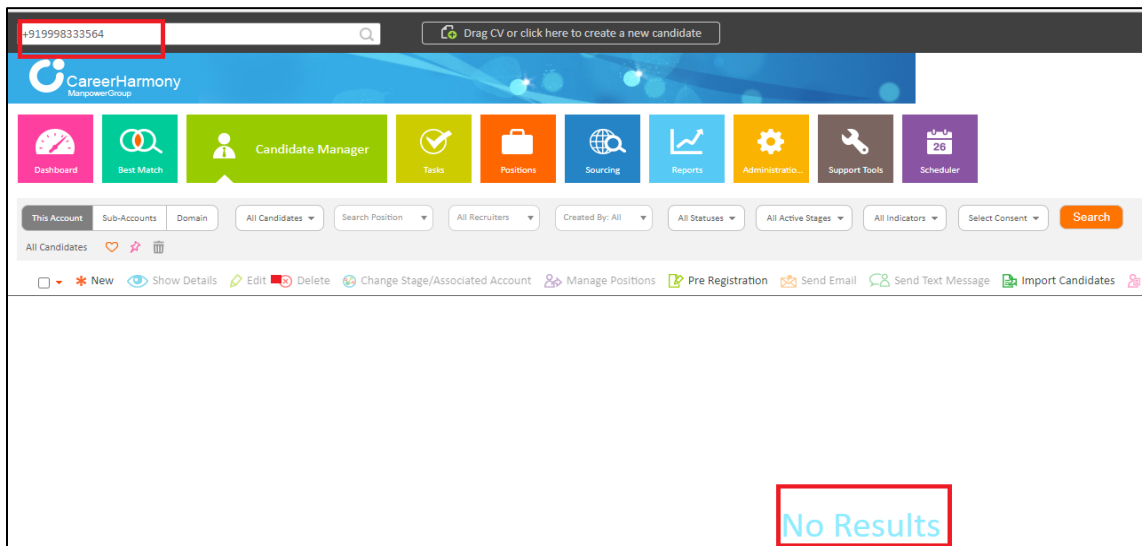

We found that there is no result when user searching candidate's username as email id which is different from email id of the candidate, then the result stated as 'No Result'. However the candidate exist with the given username.

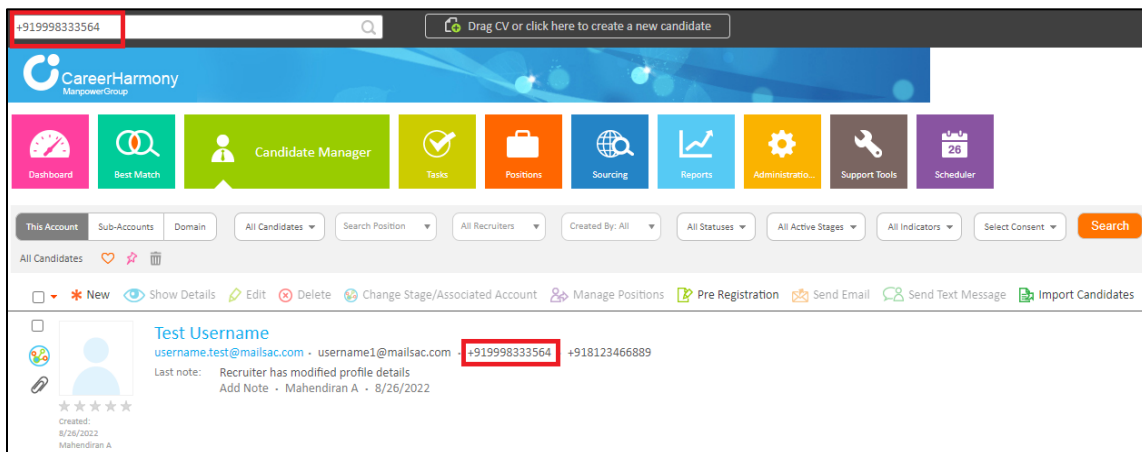

Now the issue has been addressed and the result will be displayed as expected.

1.2 Searching candidate with other phone number and country code in Global Search
With respect to the above issue, we also found that the Gobar search of other phone number with country code and plus sign is not working as expected.

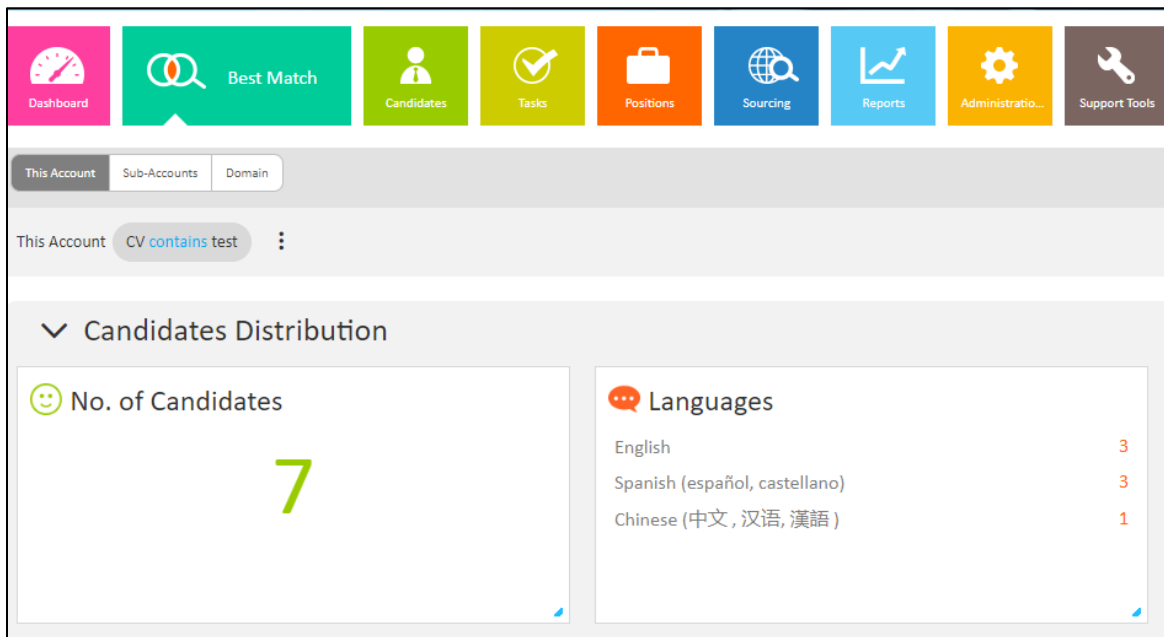

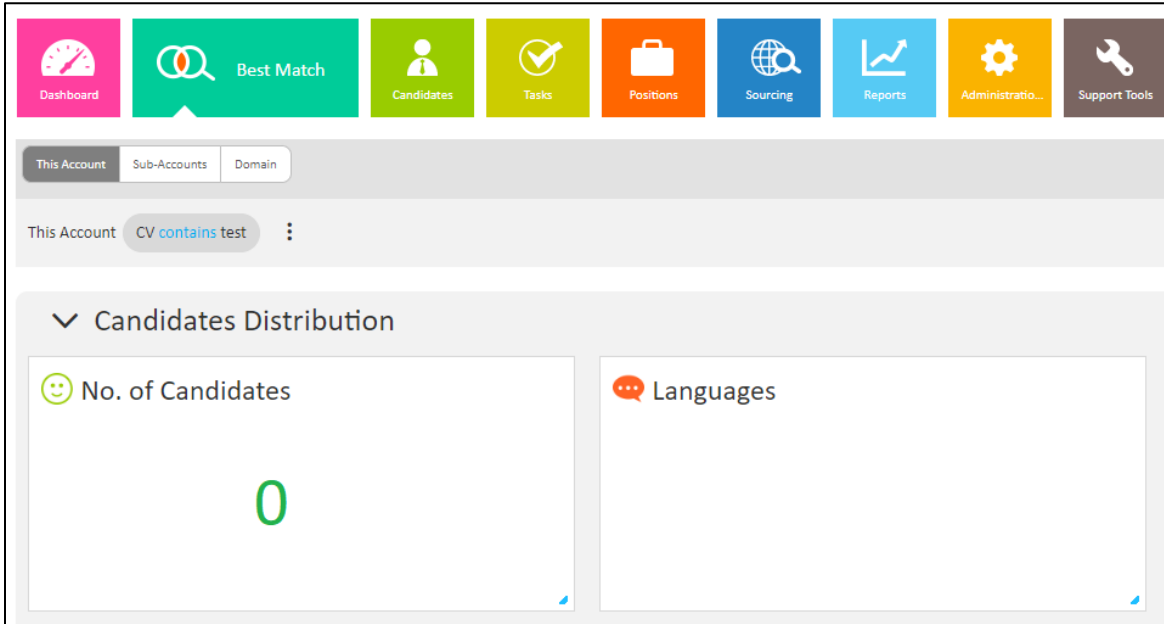

Now the issue has been fixed and the feature is functioning as expected.

1.3 CV functionality in Best Match

The CV functionality is designed to search the candidate whose CV has the value (word) in it in Best Match module. We found that this functionality is not working as expected, because of the change happened from the parser end. Now we fixed the functionality, and it is working as expected.

2. Bug Fixes

What?

Along with the above major issues, we have addressed most critical incidents / bugs to ensure a smooth user experience and make our platform a robust and reliable one. We will be communicating with all clients providing all the details of the bugs that were resolved specific to them as part of 4.5.6 release.

We truly hope you love ROMA 4.5.6 😊

Thank you
